

IHT
healthy air

Humigator™ Model 110

Remove airborne **dust, mold spores, bacteria and viruses** every 20 minutes in homes up to 6,000 square feet **without filters.**

Specifications

Air Flow (cfm)	1100
Size (in)	32 x 22 x 47
Weight (lbs)	247
Power	1200 watts - 5A at 230V 3-phase
Water	Automatic - up to 8 GPH

Simple Operation

- Standard humidistat interface
- HVAC integration as humidifier
- Adjust relative humidity to any level (40% - 50% recommended)

Indoor air is too dry for optimal health in most homes, and it contains more pathogens and toxic chemicals than ever before. These contaminants can now be removed without filters, and humidity can be precisely maintained at optimal levels.

Designed and built in the USA, the Humigator™ is a patented air scrubber that humidifies the air while removing dust and other airborne particles including mold spores, bacteria and viruses. With no filters to change, it's the ideal air quality addition to any HVAC system.

US Patents: 6,905,53, 9,265,267, 11,143,195, EP Patent Pending
